

<u>Date</u>	<u>Things Completed</u>
Monday	<ul style="list-style-type: none">• Worked on fixing lights in the theater, figured out that somehow the channel number that was set in the main box got switched from 1 to 2, so it turns out none of the lights were broken, they were just shifted in channel number by like 50, so our configuration did not work. Set it back and started playing around with controlling it through DMX software.
Tuesday	<ul style="list-style-type: none">• Can't 100% remember, but I think I further played with the lights, figured out how to get the DMX software to control the lights through my laptop instead of the lighting board, pretty sure there is a better way though as it was kind of clunky and made other things no longer work (temporarily)
Wednesday	<ul style="list-style-type: none">• Sick
Thursday	<ul style="list-style-type: none">• Worked on more SQL Bolt things, started joining data together from different tables using a common ID,• Also started working on some Scholarship stuff, compiled all of the local scholarships from the schools webpage into a spreadsheet, put the ones that I think I'm eligible for in a google calendar to keep track of deadlines and started working on the required parts of those applications
Friday	<ul style="list-style-type: none">• Went to Guidance Office, worked on setting up a computer in there, started with windows, Maddy and I remembered there were some old iMacs in some room, and started setting up one of those, formatting it and exposing myself to a new eco-system

Summary / Highlights

- Started Setup of Mac in Guidance Office, mostly done just have to update it to newer version of Mac OS
- Fixed Lights in the Theater, and started playing around with myDMX software which would help greatly with productions if it worked consistently
- Worked through SQLBolt more, got through a few more modules of that.
- Started tracking local scholarships and looking into those.
